

First time suspect, or repeat offender?

Rapid DNA identifies suspects linked to other crimes while in custody

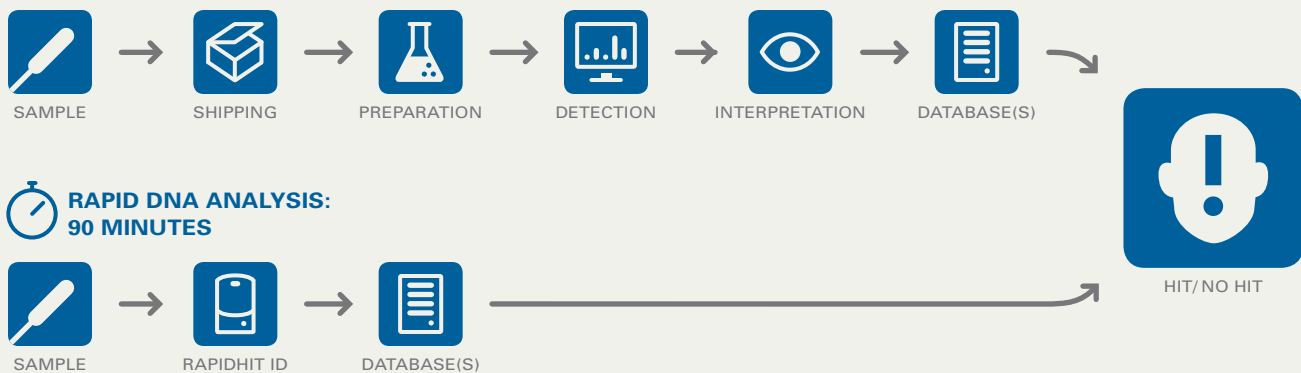

- *Get DNA results and database hits within hours instead of months*
- *Prevent further crimes by repeat offenders*
- *Rule out innocent suspects early, so you can focus on apprehending the right suspect*
- *Shorten the time from arrest to closing the case, saving investigative resources*

CUSTODY TO IDENTITY: 90 MINUTES.

A large percentage of violent crimes are committed by repeat offenders. Yet, in many cases, suspects are released from custody long before DNA evidence is processed, putting the community at risk for further victimization. Unnecessarily. With RapidHIT ID, you can identify suspects linked to other crimes in just 90 minutes. Right then and there. At the local booking station or custody suite.

CURRENT DNA ANALYSIS: WEEKS TO MONTHS

In 2015, a major metropolitan police force used IntegenX Rapid DNA technology to link a suspect in custody for a non-violent crime to an unsolved rape from several years earlier, closing the case within days.
